Accelerating Impact

ABOUT MIPPP

Connecting science, innovation, industry and healthcare for impact

The ICMR–Medical Innovations Public–Private Partnership (MIPPP) Unit serves as a dedicated unit within ICMR to administer, coordinate and facilitate national biomedical innovation initiatives through a whole-of-government and public–private partnership approach.

The Unit brings together innovation-focused programmes and stakeholder partnerships to strengthen the complete biomedical innovation pathway — from idea, intellectual property and product development to validation, technology transfer, commercialization and adoption.

OUR VISION

“To nurture and protect India’s biomedical innovation ecosystem by transforming research into intellectual property, indigenous healthcare technologies and impactful health solutions for advancing public health.”

OUR MANDATE

Nurturing and protecting India’s biomedical innovation ecosystem

Technology transfer & innovator–industry engagement

Biomedical innovation facilitation through ICMR–CDSCO MedTech Mitra

Biomedical entrepreneurship & technology translation ecosystem development

Other innovator– and industry–facing initiatives

Two initiatives, one connected mission

Medical Innovations Patent Mitra

Protect. Translate. Transfer. Impact.

Launched on 8 March 2025 under the guidance of NITI Aayog and spearheaded by ICMR, in partnership with the Department of Pharmaceuticals and supported by DPIIT. It provides comprehensive patent and technology transfer support to innovators at every stage of the patent lifecycle — fully government-funded, with end-to-end digital operations — for start-ups, academic institutions, medical colleges and ICMR-supported researchers.

End-to-end patent filing support

Technology transfer support and commercialization

MedTech Mitra

From Innovation to Clinical Adoption

A NITI Aayog-ICMR-CDSCO initiative fostering affordable and accessible indigenous therapeutics, vaccines, medical devices, in-vitro diagnostics and assistive technologies through strategic handholding for clinical evaluation, regulatory facilitation and uptake of new products.

Regulatory support

Pre-clinical / clinical evaluation

Health Technology Assessment (HTA)

Uptake of new products

Technology transfer

Technology & biomaterial transfer mechanisms.

Entrepreneurship

ICMR/DHR policy on biomedical innovation.

I2I Connect & MedX

Showcases, roundtables and calls.

OUR FOCUS AREAS

Innovation across healthcare

Medical Devices

Supporting development, validation, translation and adoption of indigenous medical devices.

In-Vitro Diagnostics

Enabling promising diagnostic technologies to progress towards validation, regulatory readiness and deployment.

Therapeutics

Supporting translation of innovative therapeutic technologies towards real-world healthcare applications.

Vaccines

Facilitating pathways for promising vaccine innovations towards development, validation and wider use.

Digital Health

Encouraging technology-enabled solutions that address emerging healthcare needs.

Assistive Technologies

Promoting innovative solutions that improve accessibility, independence and quality of life.

FROM BENCH TO BEDSIDE
